

Mahmoud Amin Moahmed

Junior Flutter Developer | Cross-Platform Mobile Applications
Cairo, Egypt | Phone: 01067792164 | Email: mimoamin70@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Junior Flutter Developer with hands-on experience building three cross-platform mobile applications, including a payments-enabled two-sided marketplace and a client-delivered document automation tool. Comfortable across BLoC/Cubit and Provider state management, REST API and Firebase integration, and Clean Architecture/MVVM. Currently building on this foundation through an IT infrastructure role at El Maadi Group while continuing to develop Flutter projects.

TECHNICAL SKILLS

- Languages: Dart
- Mobile Frameworks & Architecture: Flutter, MVVM, Clean Architecture, Dependency Injection, Design Patterns
- State Management: BLoC, Cubit, Provider
- Backend & APIs: REST APIs, Firebase, Supabase, Postman
- Data & Storage: SQLite
- Core CS: Data Structures, Algorithms, OOP, Debugging, Problem Solving
- Tools: Git, GitHub, Android Studio, VS Code
- Soft Skills: Teamwork, Communication, Time Management

PROJECTS

Mohamek — Freelance Project | [GitHub](#)

Jan 2025 – Mar 2025

- Built a two-sided mobile application in Flutter with role-based flows for lawyers and clients
- Integrated Stripe for in-app payments and REST APIs for core application data
- Implemented real-time chat and notifications using SignalR
- Applied input validation and structured error handling across client-facing flows
- Technologies: Flutter, Dart, Firebase, BLoC, REST APIs, Stripe, SignalR

Paper Automation — Freelance Project | [GitHub](#)

Sep 2024 – Dec 2024

- Delivered a Flutter application automating paperwork processing for an engineering firm client
- Built digital signature capture and company stamp placement features
- Implemented an automated archiving system for organized document storage
- Designed a reusable template engine for standardized engineering documents
- Technologies: Flutter, Dart, SQLite, Provider

Movie App — Personal Project | [GitHub](#)

March 2026

- Built a Flutter movie browsing app consuming the YTS REST API with BLoC state management
- Implemented Clean Architecture to separate data, domain, and presentation layers
- Linked out to browser-based streaming/download sources for selected titles
- Technologies: Flutter, Dart, REST APIs, BLoC, Clean Architecture

EXPERIENCE

IT Help Desk — El Maadi Group

Apr 2026 – Present

- Provide technical support and troubleshooting for internal systems and networks
- Support system performance monitoring and resolve day-to-day user issues

Flutter Developer Trainee — EASACC

Jan 2026 – Mar 2026

- Built features on real Flutter projects, working with REST APIs and BLoC/Cubit state management
- Applied Clean Architecture patterns and practiced structured debugging workflows
- Worked on UI implementation and performance improvements under senior developer guidance

CERTIFICATES

- Flutter & Dart Development Course — Route Academy

EDUCATION

Bachelor of Computer Science

Aug 2020 – Oct 2024

El Shorouk Academy (2024)

LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency
